Appendix D: List Sampling Frame Coverage Study ..................................................................................... 25
INTRODUCTION

The Annual Synar Report (ASR) format provides the means for states to comply with the reporting provisions of the Public Health Service Act (42 U.S.C. 300x-26) and the Tobacco Regulation for the Substance Abuse Prevention and Treatment Block Grant (SABG) (45 C.F.R. 96.130 (e)).

How the Synar report helps the Center for Substance Abuse Prevention

In accordance with the tobacco regulations, states are required to provide detailed information on progress made in enforcing youth tobacco access laws (FFY 2020 Compliance Progress) and future plans to ensure compliance with the Synar requirements to reduce youth tobacco access rates (FFY 2021 Intended Use Plan). These data are required by 42 U.S.C. 300x-26 and will be used by the Secretary to evaluate state compliance with the statute. Part of the mission of the Center for Substance Abuse Prevention (CSAP) is to assist states by supporting Synar activities and providing technical assistance helpful in determining the type of enforcement measures and control strategies that are most effective. This information is helpful to CSAP in improving technical assistance resources and expertise on enforcement efforts and tobacco control program support activities, including state Synar program support services, through an enhanced technical assistance program involving conferences and workshops, development of training materials and guidance documents, and onsite technical assistance consultation.

How the Synar report can help states

The information gathered for the Synar report can help states describe and analyze substate needs for program enhancements. These data can also be used to report to the state legislature and other state and local organizations on progress made to date in enforcing youth tobacco access laws when aggregated statistical data from state Synar reports can demonstrate to the Secretary the national progress in reducing youth tobacco access problems. This information will also provide Congress with a better understanding of state progress in implementing Synar, including state difficulties and successes in enforcing retailer compliance with youth tobacco access laws.

---

1The term “state” is used to refer to all the states and territories required to comply with Synar as part of the Substance Abuse Prevention and Treatment Block Grant Program requirements (42 U.S.C. 300x-64 and 45 C.F.R. 96.121).
Getting assistance in completing the Synar report

If you have questions about programmatic issues, you may call CSAP’s Division of State Programs at (240) 276-2550 and ask for your respective State Project Officer, or contact your State Project Officer directly by telephone or email. If you have questions about fiscal or grants management issues, you may call the Grants Management Officer, Office of Financial Resources, Division of Grants Management, at (240) 276-1422.

Where and when to submit the Synar report

The ASR must be received by SAMHSA no later than December 31, 2020 and must be submitted in the format specified by these instructions. Use of the approved format will avoid delays in the review and approval process. The chief executive officer (or an authorized designee) of the applicant organization must sign page one of the ASR certifying that the state has complied with all reporting requirements.

The state must upload one copy of the ASR using the online WebBGAS (Block Grant Application System). In addition, the following items must be uploaded to WebBGAS:

- **FFY 2021 Synar Survey Results:** States that use the Synar Survey Estimation System (SSES) must upload one copy of *SSES Tables 1–8* (in Excel) to WebBGAS. **Please note that, beginning with the FFY 2021 ASR, SSES will generate Tables 6, 7, and 8, which are based on the optional microdata on product type, retail outlet type, and whether identification was requested. If your state does not submit these optional data, Tables 6, 7, and 8 will be blank. Tables 6, 7, and 8 are generated for the convenience of the state, and states are not required to submit completed versions of Tables 6, 7, or 8.**
  - States that do not use SSES must upload one copy of ASR Forms 1, 4, and 5, and Forms 2 and 3, if applicable, (in Excel), as well as a database with the raw inspection data to WebBGAS.

- **Synar Inspection Form:** States must upload one blank copy of the inspection form used to record the result of each Synar inspection.

- **Synar Inspection Protocol:** States must upload a copy of the protocol used to train inspection teams on conducting and reporting the results of the Synar inspections. This document should be different than the Appendix C attached to the Annual Synar Report.

- **A scanned copy of the signed Funding Agreements/Certifications**

Each state SSA Director has been emailed a login ID and password to log onto the Synar section of the WebBGAS site.
FFY 2021: FUNDING AGREEMENTS/CERTIFICATIONS

The following form must be signed by the Chief Executive Officer or an authorized designee and submitted with this application. Documentation authorizing a designee must be attached to the application.

### PUBLIC HEALTH SERVICES ACT AND SYNAR AMENDMENT

42 U.S.C. 300x-26 requires each state to submit an annual report of its progress in meeting the requirements of the Synar Amendment and its implementing regulation (45 C.F.R. 96.130) to the Secretary of the Department of Health and Human Services. By signing below, the chief executive officer (or an authorized designee) of the applicant organization certifies that the state has complied with these reporting requirements and the certifications as set forth below.

### SYNAR SURVEY SAMPLING METHODOLOGY

The state certifies that the Synar survey sampling methodology on file with the Center for Substance Abuse Prevention and submitted with the Annual Synar Report for FFY 2021 is up-to-date and approved by the Center for Substance Abuse Prevention.

### SYNAR SURVEY INSPECTION PROTOCOL

The state certifies that the Synar Survey Inspection Protocol on file with the Center for Substance Abuse Prevention and submitted with the Annual Synar Report for FFY 2021 is up-to-date and approved by the Center for Substance Abuse Prevention.

---

**State:** PUERTO RICO

**Name of Chief Executive Officer or Designee:** Suzanne Roig-Fuertes

**Signature of CEO or Designee:**

**Title:** MHAASA ADMINISTRATOR  
**Date Signed:**

If signed by a designee, a copy of the designation must be attached.
SECTION I: FFY 2020 (Compliance Progress)

YOUTH ACCESS LAWS, ACTIVITIES, AND ENFORCEMENT

42 U.S.C. 300x-26 requires the states to report information regarding the sale/distribution of tobacco products to individuals under age 18.

1. Please indicate any changes or additions to the state tobacco statute(s) relating to youth access since the last reporting year. If any changes were made to the state law(s) since the last reporting year, please upload a copy of the state law to WebBGAS. (see 42 U.S.C. 300x-26).

   a. Has there been a change in the minimum sale age for tobacco products?
      ☒ Yes ☐ No
      
      If Yes, current minimum age: ☐ 19 ☐ 20 ☒ 21

   b. Have there been any changes in state law that impact the state’s protocol for conducting Synar inspections?
      ☒ Yes ☐ No
      
      If Yes, indicate change. (Check all that apply.)
      ☐ Changed to require that law enforcement conduct inspections of tobacco outlets
      ☐ Changed to make it illegal for youth to possess, purchase or receive tobacco
      ☐ Changed to require ID to purchase tobacco
      ☐ Changed definition of tobacco products
      ☐ Other change(s) (Please describe.)

   c. Have there been any changes in state law that impact the following?
      Licensing of tobacco vendors ☐ Yes ☒ No
      Penalties for sales to minors ☐ Yes ☒ No
      Vending machines ☐ Yes ☒ No
      Added product categories to youth access law ☐ Yes ☒ No

2. Describe how the Annual Synar Report (see 45 C.F.R. 96.130(e)) was made public within the state prior to submission of the ASR. (Check all that apply.)
   
   ☐ Placed on file for public review
   ☒ Posted on a state agency Web site (Please provide exact Web address and the date when the FFY 2021 ASR was posted to this Web address.)

      Web address: ______________________________
      Date published: ______________________________

   ☐ Notice published in a newspaper or newsletter
   ☐ Public hearing
3. Identify the following agency or agencies (see 42 U.S.C. 300x-26 and 45 C.F.R. 96.130).

a. The state agency(ies) designated by the Governor for oversight of the Synar requirements:
   
   Mental Health and Anti-Addiction Services Administration (MHAASA)

   Has this changed since last year’s Annual Synar Report?
   
   ☐ Yes  ☒ No

b. The state agency(ies) responsible for conducting random, unannounced Synar inspections:
   
   Mental Health and Anti-Addiction Services Administration

   Has this changed since last year’s Annual Synar Report?
   
   ☐ Yes  ☒ No

c. The state agency(ies) responsible for enforcing youth tobacco access law(s):
   
   Puerto Rico Treasury Department, Puerto Rico Police and the Consumers Affairs Department

   Has this changed since last year’s Annual Synar Report?
   
   ☐ Yes  ☒ No

4. Identify the following agencies and describe their relationship with the agency responsible for the oversight of the Synar requirements.

   a. Identify the state agency responsible for tobacco prevention activities (the agency that receives the Centers for Disease Control and Prevention’s National Tobacco Control Program funding).
      
      Puerto Rico Health Department

   b. Has the responsible agency changed since last year’s Annual Synar Report?
      
      ☐ Yes  ☒ No

   c. Describe the coordination and collaboration that occur between the agency responsible for tobacco prevention and the agency responsible for oversight of the Synar requirements. (Check all that apply.) The two agencies

      ☐ Are the same
      ☐ Have a formal written memorandum of agreement
☑ Have an informal partnership
☐ Conduct joint planning activities
☐ Combine resources
☑ Have other collaborative arrangement(s) (Please describe.) The Department of Health is part of the Tobacco Prevention Advisory Committee lead by MHAASA.
☐ No relationship

d. Does a state agency contract with the Food and Drug Administration’s Center for Tobacco Products (FDA/CTP) to enforce the youth access and advertising restrictions in the Family Smoking Prevention and Tobacco Control Act?  
☐ Yes  ☑ No (if no, go to Question 5)

e. If yes, identify the state agency responsible for enforcing the youth access and advertising restrictions in the Family Smoking Prevention and Tobacco Control Act (the agency that is under contract to the Food and Drug Administration’s Center for Tobacco Products (FDA/CTP)).

________________________________________________________

f. Has the responsible agency changed since last year’s Annual Synar Report?
☐ Yes  ☐ No

g. Describe the coordination and collaboration that occur between the agency contracted with the FDA to enforce federal youth tobacco access laws and the agency responsible for oversight of the Synar requirements. (Check all that apply.) The two agencies:

☐ Are the same  
☐ Have a formal written memorandum of agreement  
☐ Have an informal partnership  
☐ Conduct joint planning activities  
☐ Combine resources  
☐ Have other collaborative arrangement(s) (Please describe.) _____
☐ No relationship

h. Does the state use data from the FDA enforcement inspections for Synar survey reporting?
☐ Yes  ☐ No
5. Please answer the following questions regarding the state’s activities to enforce the state’s youth access to tobacco law(s) in FFY 2020 (see 42 U.S.C. 300x-26 and 45 C.F.R. 96.130(e)).

a. Which one of the following describes the enforcement of state youth access to tobacco laws carried out in your state? (Check one category only.)

- ☑ Enforcement is conducted exclusively by local law enforcement agencies.
- ☐ Enforcement is conducted exclusively by state agency(ies).
- ☐ Enforcement is conducted by both local and state agencies.

b. The following items concern penalties imposed for all violations of state youth access to tobacco laws by LOCAL AND/OR STATE LAW ENFORCEMENT AGENCIES (this does not include enforcement of local laws or federal youth tobacco access laws). Please fill in the number requested. If state law does not allow for an item, please mark “NA” (not applicable). If a response for an item is unknown, please mark “UNK.” The chart must be filled in completely.

</table>

There were warnings issued to those outlets found in violation during the Synar Study. Also, the clerks were oriented about the law by the MHAASA and the Puerto Rico Treasury Department.

c. Are citations or warnings issued to retailers or clerks who sell tobacco to minors for inspections that are part of the Synar survey?

- ☑ Yes    ☐ No

If “Yes” to 5c, please describe the state’s procedure for minimizing risk of bias to the survey results from retailers alerting each other to the presence of the survey teams:

To minimize the risk of bias, the team split into groups and conducted simultaneous inspections. Throughout the inspection period, team members maintained communication. In the event that one team issues a citation, all other teams are immediately notified. When the youth inspectors entered an outlet, they had to observe if there was prior knowledge about the inspection. The youth inspector had to leave if there was knowledge of the inspection and postpone the inspection for a later date that was unannounced.

d. Which one of the following best describes the level of enforcement of state youth access to tobacco laws carried out in your state? (Check one category only.)
Enforcement is conducted only at those outlets randomly selected for the Synar survey.

Enforcement is conducted only at a subset of outlets not randomly selected for the Synar survey.

Enforcement is conducted at a combination of outlets randomly selected for the Synar survey and outlets not randomly selected for the Synar survey.

e. **Did every tobacco outlet in the state receive at least one compliance check that included enforcement of the state youth tobacco access law(s) in the last year?**

   ☐ Yes  ☒ No

f. **What additional activities are conducted in your state to support enforcement and compliance with state youth tobacco access law(s)?** *(Check all that apply and briefly describe each activity in the text boxes below each activity.)*

   ☒ Merchant education and/or training

   MHAASA’s Regional Prevention Center Staff visited 3,153 outlets listed by the Puerto Rico Treasury Department as licensed retailers to provide orientations about legislation that prohibits the sale, donation, and distribution of cigarettes and other tobacco products including e-cigarettes to minors and the implications of law violations, and the prohibition of advertising if located within 500 ft. from schools. They also gave retailers the appropriate posters/stickers with information of current legislation alerting potential consumers on the prohibition of the sale of tobacco products to minors.

   ☐ Incentives for merchants who are in compliance (e.g., nonenforcement compliance checks in which compliant retailers are given positive reinforcement and noncompliant retailers are warned about youth access laws)

   ☐ Media use to publicize compliance inspection results

   ☐ Community mobilization to increase support for retailer compliance with youth access laws

   ☒ Community education regarding youth access laws

   MHAASA’s staff partner with the Lung Association’s Puerto Rico Chapter for the “Non-Smoking Day Activity”. This year the campaign was directed to start to quit smoking with the slogan: “Now is the time to begin”. Also, MHAASA provided virtual orientations to students from the public, private schools, and colleges to alert about the harm of the use of e-cigarettes and vaping.
Other activities *(Please list.)* Tobacco Prevention Advisory Committee, and Social Media Campaign

**Tobacco Prevention Advisory Committee**

MHAASA continues leading the Tobacco Prevention Advisory Committee (CAPT by its Spanish acronym) with the Third Mission Institute of the Albizu University. The CAPT was created to give counsel and offer recommendations in planning, development, and implementation of public policy. The CAPT members are key staff of the following state agencies:

- Mental Health and Anti-Addiction Services Administration
- Puerto Rico Health Department
- Puerto Rico Treasury Department
- Puerto Rico Police Department
- Consumer Affairs Department
- Department of Justice
- Puerto Rico Department of Child and Family Affairs

The CAPT met almost on a monthly basis, it was interrupted due to lock down established by the Governor of Puerto Rico who signed Executive Order No.: OE-2020-023 on March 15, 2020. Government and private sectors were able to partially open on July 6, 2020. The CAPT was able to continue meeting virtually through an online platform. The Committee have been monitoring the following legislative measures:

- **Resolution 993**: orders a thorough investigation into compliance with the provisions of Section 6042.8 (cigarette-related crimes) of the Internal Revenue Code.
- **Resolution 1522**: orders an investigation on the effects of the e-cigarettes.
- **Bill 1392**: prohibits the sale of e-cigarettes; grants the Department of Health the responsibility for regulation, establishing fines, and authorizing the confiscation of products; ordering the establishment of educational campaigns to prevent the use and sale of e-cigarettes; and for the other related purposes.
- **Bill 2245**: prohibits sales of e-cigarettes, grants the Department of Consumer Affairs regulatory responsibility for establishing fines and confiscation of products.
- **Bill 2276**: amendment to the Internal Revenue Code to increase the minimum sale age of tobacco products to 21 years of age.
- **Bill 2319**: to establish that all commercial establishments that sell e-cigarettes will notify the buyers about the harmful effects on the health of the product; orders the Puerto Rico Department of Health to begin an educational campaign on the harmful effects of e-cigarettes.
- **Bill 1519**: amendments to the Internal Revenue Code, the law to correct the exploitation of children under 18 years of age, and the law governing the advertising and promotion of all tobacco products to increase the minimum sale age of tobacco products to 21 years of age.
MHAASA and the CAPT supported the Bill 2276 to raise the age to 21 for the purchase of cigarettes and other tobacco products and Senate Resolution 993. The Senate presented a report that includes the specific recommendations of the CAPT in regard to the Synar Study and the contracting of minors. The project was sent to the Rules and Scheduling Commission of the Senate for programming of the final vote, but it was not considered in the last session. MHAASA and the CAPT started to work on a new project to be presented to the administration in January 2021.

**Social Media Campaign**

MHAASA continues to have two audiovisual campaigns, “I decide to not smoke” and “How much time you have left?” in the agency’s Facebook page.
SYNAR SURVEY METHODS AND RESULTS

The following questions pertain to the survey methodology and results of the Synar survey used by the state to meet the requirements of the Synar Regulation in FFY 2020 (see 42 U.S.C. 300x-26 and 45 C.F.R. 96.130).

6. Has the sampling methodology changed from the previous year?
   ☐ Yes  ☒ No

   The state is required to have an approved up-to-date description of the Synar sampling methodology on file with CSAP. Please submit a copy of your Synar Survey Sampling Methodology (Appendix B). If the sampling methodology changed from the previous reporting year, these changes must be reflected in the methodology submitted.

   a. If yes, describe how and when this change was communicated to SAMHSA

   [Blank]

7. Please answer the following questions regarding the state’s annual random, unannounced inspections of tobacco outlets (see 45 C.F.R. 96.130(d)(2)).

   a. Did the state use the optional Synar Survey Estimation System (SSES) to analyze the Synar survey data?
      ☐ Yes  ☒ No

      If Yes, upload a copy of SSES tables 1–8 (in Excel) to WebBGAS. Then go to Question 8. If No, continue to Question 7b.

   b. Report the weighted and unweighted Retailer Violation Rate (RVR) estimates, the standard error, accuracy rate (number of eligible outlets divided by the total number of sampled outlets), and completion rate (number of eligible outlets inspected divided by the total number of eligible outlets).

      Unweighted RVR
      __________________________

      Weighted RVR
      __________________________

      Standard error (s.e.) of the (weighted) RVR
      __________________________

      Fill in the blanks to calculate the right limit of the right-sided 95% confidence interval.

      \[
      \text{RVR Estimate} + (1.645 \times \text{Standard Error}) = \text{Right Limit}
      \]

      Accuracy rate
      __________________________

      Completion rate
      __________________________
c. Fill out Form 1 in Appendix A (Forms 1–5). *(Required regardless of the sample design.)*

d. **How were the (weighted) RVR estimate and its standard error obtained?**
*(Check the one that applies.)*

- [ ] Form 2 (Optional) in Appendix A (Forms 1–5) *(Attach completed Form 2.)*
- [ ] Other *(Please specify. Provide formulas and calculations or attach and explain the program code and output with description of all variable names.)*

---

e. **If stratification was used, did any strata in the sample contain only one outlet or cluster this year?**

- [ ] Yes
- [ ] No
- [ ] No stratification

*If Yes, explain how this situation was dealt with in variance estimation.*

---

f. **Was a cluster sample design used?**

- [ ] Yes
- [ ] No

*If Yes, fill out and attach Form 3 in Appendix A (Forms 1–5), and answer the following question.*

*If No, go to Question 7g.*

**Were any certainty primary sampling units selected this year?**

- [ ] Yes
- [ ] No

*If Yes, explain how the certainty clusters were dealt with in variance estimation.*

---

g. **Report the following outlet sample sizes for the Synar survey.**

<table>
<thead>
<tr>
<th><strong>Sample Size</strong></th>
<th><strong>Effective sample size</strong> <em>(sample size needed to meet the SAMHSA precision requirement assuming simple random sampling)</em></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Target sample size</strong> <em>(the product of the effective sample size and the design effect)</em></td>
<td></td>
</tr>
<tr>
<td><strong>Original sample size</strong> <em>(inflated sample size of the target sample to counter the sample attrition due to ineligibility and noncompletion)</em></td>
<td></td>
</tr>
<tr>
<td><strong>Eligible sample size</strong> <em>(number of outlets found to be eligible in the sample)</em></td>
<td></td>
</tr>
<tr>
<td><strong>Final sample size</strong> <em>(number of eligible outlets in the sample for which an inspection was completed)</em></td>
<td></td>
</tr>
</tbody>
</table>

---

h. **Fill out Form 4 in Appendix A (Forms 1–5).**
8. Did the state’s Synar survey use a list frame?
   ☒ Yes  ☐ No
   
   If Yes, answer the following questions about its coverage.
   
   a. The calendar year of the latest Sampling frame coverage study: 2015
   
   b. Percent coverage from the latest Sampling frame coverage study: 91.5
   
   c. Was a new study conducted in this reporting period?
      ☐ Yes  ☒ No
      
      If Yes, please complete Appendix D (List Sampling Frame Coverage Study) and submit it with the Annual Synar Report.
      
   d. The calendar year of the next coverage study planned: 2021

9. Has the Synar survey inspection protocol changed from the previous year?
   ☒ Yes  ☐ No
   
   The state is required to have an approved up-to-date description of the Synar inspection protocol on file with CSAP. Please submit a copy of your Synar Survey Inspection Protocol (Appendix C). If the inspection protocol changed from the previous year, these changes must be reflected in the protocol submitted.
   
   a. If Yes, describe how and when this change was communicated to SAMHSA
      
      The Synar Survey Inspection Protocol (Appendix C) was sent to SAMHSA on July 22, 2020. The new protocol established that as part of the Governors Executive Order 2020-033, all the population are required to use a face mask in order to enter any outlet. All the youth inspectors are required to use face masks all the time.
      
   b. Provide the inspection period: From 11/16/2020 to 12/16/2020
      
   c. Provide the number of youth inspectors used in the current inspection year:
      11
      
      NOTE: If the state uses SSES, please ensure that the number reported in 9b matches that reported in SSES Table 4, or explain any difference.
      
   d. Fill out and attach Form 5 in Appendix A (Forms 1–5). (Not required if the state used SSES to analyze the Synar survey data.)
SECTION II: FFY 2021 (Intended Use):

Public Law 42 U.S.C. 300x-26 of the Public Health Service Act and 45 C.F.R. 96.130 (e) (4, 5) require that the states provide information on future plans to ensure compliance with the Synar requirements to reduce youth tobacco access.

1. In the upcoming year, does the state anticipate any changes in:
   - Synar sampling methodology ☐ Yes ☒ No
   - Synar inspection protocol ☐ Yes ☒ No

   If changes are made in either the Synar sampling methodology or the Synar inspection protocol, the state is required to obtain approval from CSAP prior to implementation of the change and file an updated Synar Survey Sampling Methodology (Appendix B) or an updated Synar Survey Inspection Protocol (Appendix C), as appropriate.

2. Please describe the state’s plans to maintain and/or reduce the target rate for Synar inspections to be completed in FFY 2021. Include a brief description of plans for law enforcement efforts to enforce youth tobacco access laws, activities that support law enforcement efforts to enforce youth tobacco access laws, and any anticipated changes in youth tobacco access legislation or regulation in the state.

   MHAASA will maintain the Tobacco Prevention Advisory Committee (CAPT by its Spanish acronym). This year the CAPT was able to meet six times from January to December 2020. This year the Committee worked on the strategic planning process. The CAPT selected three factors to include in the work plan: commercial accessibility, tobacco promotion and enforcement of tobacco-related laws.

   The Committee discussed eight Bills and also worked an endorsement letter for the Bill 2276 to amend the Internal Revenue Code to raise the minimum sale age of tobacco products from 18 to 21 years of age. Currently, the CAPT is working on a Bill to be presented to the administration. The Bill pursues to increase the minimum sale age of tobacco from 18 to 21 years. Include the definition of the term: “minor”, clerks must request identification from anyone who appears to be under 30 years of age, grant a waiver to the MHAASA for hiring minors in the Synar Study, and the money of the fines will be directed to the Tobacco Control Program of the Department of Health, the Consumption Tax Bureau for purposes of compliance with laws related to tobacco, and the Auxiliary Administration of Prevention and Promotion of the MHAASA.

3. Describe any challenges the state faces in complying with the Synar regulation. (Check all that apply and describe each challenge in the text box below it.)

   ☒ Limited resources for law enforcement of youth access laws

   The enforcement agencies continue to have a shortage of inspections agents due to retirement of many of their staff members. The Governor of Puerto Rico open another window for government staff for early retirement. The economic situation of government agencies limits the recruitment of new Internal Revenue Agents. This year some of the agents of the Puerto Rico Treasury Department had difficulty...
to work during the study because some had coworkers positive to COVID-19 and they were put on quarantine, at some offices there was no official vehicles available and or no gasoline for their vehicles.

- Limited resources for activities to support enforcement and compliance with youth tobacco access laws
  
The resources available for the enforcement activities are limited to economic situation of the island.

- Limitations in the state youth tobacco access laws
  
  Although the President Trump signed legislation amending the Federal, Food, Drug, and Cosmetic Act, and raising the federal minimum age of sale of tobacco products from 18 to 21 years, in Puerto Rico the Internal Revenue Agents can’t enforced a federal law. The Internal Revenue Code of Puerto Rico should be amended to raise the age for sale tobacco from 18 to 21.

- Limited public support for enforcement of youth tobacco access laws

- Limitations on completeness/accuracy of list of tobacco outlets
  
  This year the Synar Study was affected by the pandemic of COVID-19. Many of the outlets was closed during the Synar Study due to the Governor Executive Order. On March 15, 2020 the Governor of Puerto Rico, signed an Executive Order No. OE-2020-023 in order to implement the closure of governmental and private sector operations in order to control the effects of COVID-19, and the risk of infection on the island. The order established the mandatory use of facial mask in public places, the closure of shopping centers, movies, theaters, casinos, amusement parks, gyms, bars, or any similar place or event that may promote the gathering of a group of citizens in the same place. Also prohibit the opening of bars and restaurants along country roads. The order also established a curfew from 10:00 p.m. to 5:00 a.m. Only gas stations, pharmacies, supermarkets were able to be open. The lock down was until July 6, 2020.
  
  Also, on July 6, 2020 the Governor authorized that employees from public and private sector to go back to work, restaurants and other outlets to reopen following social distance, the use of facial mask, and the used of hand sanitizers. The new executive order also established the amount of capacity in restaurants on 20%, then increased to 50% and then the contagious of COVID-19 went up and the Governor decreased again to 30% of capacity.
  
  The last executive order is more restrictive, it started on December 7, 2020 until January 2, 2021 all outlets are close on Sundays; only gas stations, hardware stores, pharmacies and supermarkets can open. No sale of alcohol from Saturday 5:00 a.m. to Mondays to 5:00 a.m.

- Limited expertise in survey methodology

</tbody>
</table>
Safety concerns for staff and youth when the outlets are located in high-risk crime areas and are open for business after 8:00 pm is a challenge. Instability in Puerto Rico Economy (i.e. fiscal crisis, unemployment) continues to influence tobacco sales. An increase in family and personal stress may also be aspects that influence smoking. Businesses are feeling the effects of the economy; therefore, they are more willing to sell to minors to increase profit margins. MHAASA plans to continue its efforts and keeping awareness of this issue at the forefront with law enforcement, retailers, and the general community.
APPENDIX A: FORMS 1–5

FORM 1 (Required for all states not using the Synar Survey Estimation System (SSES) to analyze the Synar Survey data)

Complete Form 1 to report sampling frame and sample information and to calculate the unweighted retailer violation rate (RVR) using results from the current year’s Synar survey inspections.

**Instructions for Completing Form 1:** In the top right-hand corner of the form, provide the state name and reporting federal fiscal year (FFY 2021). Provide the remaining information by stratum if stratification was used. Make copies of the form if additional rows are needed to list all the strata.

**Column 1:** *If stratification was used:*

1(a) Sequentially number each row.
1(b) Write in the name of each stratum. All strata in the state must be listed.

*If no stratification was used:*

1(a) Leave blank.
1(b) Write “state” in the first row (indicates that the whole state is a single stratum).

**Note for unstratified samples:** For Columns 2–5, wherever the instruction refers to “each stratum,” report the specified information for the state as a whole.

**Column 2:**

2(a) Report the number of over-the-counter (OTC) outlets in the sampling frame in each stratum.
2(b) Report the number of vending machine (VM) outlets in the sampling frame in each stratum.
2(c) Report the combined total of OTC and VM outlets in the sampling frame in each stratum.

**Column 3:**

3(a) Report the estimated number of eligible OTC outlets in the OTC outlet population in each stratum.
3(b) Report the estimated number of eligible VM outlets in the VM outlet population in each stratum.
3(c) Report the combined total estimated number of eligible OTC and VM outlets in the total outlet population in each stratum.

*The estimates for Column 3 can be obtained from the Synar survey sample as the weighted sum of eligible outlets by outlet type.*

**Column 4:**

4(a) Report the number of eligible OTC outlets for which an inspection was completed, for each stratum.
4(b) Report the numbers of eligible VM outlets for which an inspection was completed, for each stratum.
4(c) Report the combined total of eligible OTC and VM outlets for which an inspection was completed, for each stratum.

**Column 5:**

5(a) Report the number of OTC outlets found in violation of the law as a result of completed inspections, for each stratum.
5(b) Report the number of VM outlets found in violation of the law as a result of completed inspections, for each stratum.
5(c) Report the combined total of OTC and VM outlets found in violation of the law as a result of completed inspections, for each stratum.

**Totals:** For each subcolumn (a–c) in Columns 2–5, provide totals for the state as a whole in the last row of the table. These numbers will be the sum of the numbers in each row for the respective column.
Summary of Synar Inspection Results by Stratum

<table>
<thead>
<tr>
<th>STRATUM</th>

<th>NO. OF OUTLETS FOUND IN VIOLATION DURING INSPECTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1)</td>
<td>(2)</td>
<td>(3)</td>
<td>(4)</td>
<td>(5)</td>
</tr>
</tbody>
</table>

(1) Row # | (b) Stratum Name | (a) Over-the-Counter (OTC) | (b) Vending Machines (VM) | (c) Total Outlets (2a+2b) | (a) Over-the-Counter (OTC) | (b) Vending Machines (VM) | (c) Total Outlets (3a+3b) | (a) Over-the-Counter (OTC) | (b) Vending Machines (VM) | (c) Total Outlets (4a+4b) | (a) Over-the-Counter (OTC) | (b) Vending Machines (VM) | (c) Total Outlets (5a+5b) |

RECORD COLUMN TOTALS ON LAST LINE (LAST PAGE ONLY IF MULTIPLE PAGES ARE NEEDED).
FORM 2 (Optional)
Appropriate for stratified simple or systematic random sampling designs.

Complete Form 2 to calculate the weighted RVR. This table (in Excel form) is designed to calculate the weighted RVR for stratified simple or systematic random sampling designs, accounting for ineligible outlets and noncomplete inspections encountered during the annual Synar survey.

**Instructions for Completing Form 2:** In the top right-hand corner of the form, provide the state name and reporting federal fiscal year (FFY 2021).

| Column 1 | Write in the name of each stratum into which the sample was divided. These should match the strata reported in Column 1(b) of Form 1. |
| Column 2 | Report the number of outlets in the sampling frame in each stratum. These numbers should match the numbers reported for the respective strata in Column 2(c) of Form 1. |
| Column 3 | Report the original sample size (the number of outlets originally selected, including substitutes or replacements) for each stratum. |
| Column 4 | Report the number of sample outlets in each stratum that were found to be eligible during the inspections. Note that this number must be less than or equal to the number reported in Column 3 for the respective stratum. |
| Column 5 | Report the number of eligible outlets in each stratum for which an inspection was completed. Note that this number must be less than or equal to the number reported in Column 4. These numbers should match the numbers reported in Column 4(c) of Form 1 for the respective strata. |
| Column 6 | Report the number of eligible outlets inspected in each stratum that were found in violation. These numbers should match the numbers reported in Column 5(c) of Form 1 for the stratum. |
| Column 7 | Form 2 (in Excel form) will automatically calculate the stratum RVR for each stratum in this column. This is calculated by dividing the number of inspected eligible outlets found in violation (Column 6) by the number of inspected eligible outlets (Column 5). The state unweighted RVR will be shown in the Total row of Column 7. |
| Column 8 | Form 2 (in Excel form) will automatically calculate the estimated number of eligible outlets in the population for each stratum. This calculation is made by multiplying the number of outlets in the sampling frame (Column 2) times the number of eligible outlets (Column 4) divided by the original sample size (Column 3). Note that these numbers will be less than or equal to the numbers in Column 2. |
| Column 9 | Form 2 (in Excel form) will automatically calculate the relative stratum weight by dividing the estimated number of eligible outlets in the population for each stratum in Column 8 by the Total of the values in Column 8. |
| Column 10 | Form 2 (in Excel form) will automatically calculate each stratum’s contribution to the state weighted RVR by multiplying the stratum RVR (Column 7) by the relative stratum weight (Column 9). The weighted RVR for the state will be shown in the Total row of Column 10. |
| Column 11 | Form 2 (in Excel form) automatically calculates the standard error of each stratum’s RVR (Column 7). The standard error for the state weighted RVR will be shown in the Total row of Column 11. |
| TOTAL: | For Columns 2–6, Form 2 (in Excel form) provides totals for the state as a whole in the last row of the table. For Columns 7–11, it calculates the respective statistic for the state as a whole. |
FORM 2 (Optional) Appropriate for stratified simple or systematic random sampling designs.

- \( w \) - relative stratum weight (\( w = N'/\text{Total Column 8} \))
- \( pw \) - stratum contribution to the weighted RVR
- s.e. - standard error of the stratum RVR
FORM 3 (Required when a cluster design is used for all states not using the Synar Survey Estimation System [SSES] to analyze the Synar survey data.)

Complete Form 3 to report information about primary sampling units when a cluster design was used for the Synar survey.

**Instructions for Completing Form 3:** In the top right-hand corner of the form, provide the state name and reporting federal fiscal year (FFY 2021).

Provide information by stratum if stratification was used. Make copies of the form if additional rows are needed to list all the strata.

Column 1: Sequentially number each row.

Column 2: *If stratification was used:* Write in the name of stratum. All strata in the state must be listed.

*If no stratification was used:* Write “state” in the first row to indicate that the whole state constitutes a single stratum.

Column 3: Report the number of primary sampling units (PSUs) (i.e., first-stage clusters) created for each stratum.

Column 4: Report the number of PSUs selected in the original sample for each stratum.

Column 5: Report the number of PSUs in the final sample for each stratum.

**TOTALS:** For Columns 3–5, provide totals for the state as a whole in the last row of the table.

<table>

FORM 5 (Required for all states not using the Synar Survey Estimation System [SSES] to analyze the Synar survey data)

Complete Form 5 to show the distribution of outlet inspection results by age and gender of the youth inspectors.

Instructions for Completing Form 5: In the top right-hand corner of the form, provide the state name and reporting federal fiscal year (FFY 2021).

Column 1: Enter the number of attempted buys by youth inspector age and gender.
Column 2: Enter the number of successful buys by youth inspector age and gender.

If the inspectors are age eligible but the gender of the inspector is unknown, include those inspections in the “Other” row. Calculate subtotals for males and females in rows marked “Male Subtotal” and “Female Subtotal.” Sum subtotals for Male, Female, and Other and record in the bottom row marked “Total.” Verify that that the total of attempted buys and successful buys equals the total for Column 4(c) and Column 5(c), respectively, on Form 1. If the totals do not match, please explain any discrepancies.

APPENDIXES B & C: FORMS

Instructions

Appendix B (Sampling Design) and Appendix C (Inspection Protocol) are to reflect the state’s CSAP-approved sampling design and inspection protocol. These appendixes, therefore, should generally describe the design and protocol and, with the exception of Question #10 of Appendix B, are not to be modified with year-specific information. Please note that any changes to either appendix must receive CSAP’s advance, written approval. To facilitate the state’s completion of this section, simply cut and paste the previously approved sampling design (Appendix B) and inspection protocol (Appendix C) and respond to Question #10 of Appendix B to provide the requested information about sample size calculations for the Synar survey conducted in FFY 2020.
APPENDIX B: SYNAR SURVEY SAMPLING METHODOLOGY

State: PR
FFY: 2021

1. What type of sampling frame is used?
   - ☑ List frame (Go to Question 2.)
   - ❑ Area frame (Go to Question 3.)
   - ❑ List-assisted area frame (Go to Question 2.)

2. List all sources of the list frame. Indicate the type of source from the list below. Provide a brief description of the frame source. Explain how the lists are updated (method), including how new outlets are identified and added to the frame. In addition, explain how often the lists are updated (cycle). (After completing this question, go to Question 4.)

   Use the corresponding number to indicate Type of Source in the table below.

   1 – Statewide commercial business list
   2 – Local commercial business list
   3 – Statewide tobacco license/permit list
   4 – Statewide retail license/permit list
   5 – Statewide liquor license/permit list
   6 – Other

   - Puerto Rico Treasury Department - List of Licensed Tobacco Outlets
     - Type of Source: 3
     - Description: The list contained all the licensed tobacco outlets within the 78 municipalities that comprise Puerto Rico.
     - Updating Method and Cycle: The Puerto Rico Treasury Department provides to MHAASA officials the updated list of licensed tobacco outlets in an annual basis.

3. If an area frame is used, describe how area sampling units are defined and formed.

   a. Is any area left out in the formation of the area frame?
      - ☑ Yes  ❑ No

      If Yes, what percentage of the state’s population is not covered by the area frame?
      _____%

4. Federal regulation requires that vending machines be inspected as part of the Synar survey. Are vending machines included in the Synar survey?
   - ☑ Yes  ❑ No
If No, please indicate the reason(s) they are not included in the Synar survey. Please check all that apply.

☐ State law bans vending machines.
☐ State law bans vending machines from locations accessible to youth.
☐ State has a contract with the FDA and is actively enforcing the vending machine requirements of the Family Smoking Prevention and Tobacco Control Act.
☐ Other (Please describe.) ____________________________

If Yes, please indicate how likely it is that vending machines will be sampled.

☐ Vending machines are sampled separately to ensure vending machines are included in the sample
☒ Vending machines are sampled together with over the counter outlets, so it is possible that no vending machines were sampled, however they are included in the sampling frame and have a non-zero probability of selection
☐ Other reasons (Please describe.) ____________________________

5. Which category below best describes the sample design? (Check only one.)

☐ Census (STOP HERE: Appendix B is complete.)
Unstratified statewide sample:
☐ Simple random sample (Go to Question 9.)
☒ Systematic random sample (Go to Question 6.)
☐ Single-stage cluster sample (Go to Question 8.)
☐ Multistage cluster sample (Go to Question 8.)
Stratified sample:
☐ Simple random sample (Go to Question 7.)
☐ Systematic random sample (Go to Question 6.)
☐ Single-stage cluster sample (Go to Question 7.)
☐ Multistage cluster sample (Go to Question 7.)
☐ Other (Please describe and go to Question 9.) ____________________________

6. Describe the systematic sampling methods. (After completing Question 6, go to Question 7 if stratification is used. Otherwise go to Question 9.)

The sampling methodology used in this evaluation consists of systematic sample selection. This statistical method involves the selection of every $k^{th}$ element from a sampling frame, where $k$, the sampling interval, is calculated as: $k = \frac{\text{population size} (N)}{\text{sample size} (n)}$. Using this procedure each element in the population has a known and equal probability of selection. This makes systematic sampling functionally similar to simple random sampling. It is however, more efficient (if variance within systematic sample is more than variance of population) and much less expensive to carry out (Daniel, W. 1995).

The sampling frame includes over the counter (OTC) outlets and vending machine outlets (VM). From the sampling frame, a starting point is chosen using a random number generator, and thereafter outlets are selected at regular intervals. The systematic sample of outlets is selected to conduct the study across areas of the island represented by the 12 MHAASA Regional Prevention Centers. Each
7. Provide the following information about stratification.
   a. Provide a full description of the strata that are created.

   b. Is clustering used within the stratified sample?
   - Yes  (Go to Question 8.)
   - No   (Go to Question 9.)

8. Provide the following information about clustering.
   a. Provide a full description of how clusters are formed. (If multistage clusters are used, give definitions of clusters at each stage.)

   b. Specify the sampling method (simple random, systematic, or probability proportional to size sampling) for each stage of sampling and describe how the method(s) is (are) implemented.

9. Provide the following information about determining the Synar Sample.
   a. Was the Synar Survey Estimation System (SSES) used to calculate the sample size?
      - Yes  (Respond to part b.)
      - No   (Respond to part c and Question 10c.)

   b. SSES Sample Size Calculator used?
      - State Level  (Respond to Question 10a.)
      - Stratum Level  (Respond to Question 10a and 10b.)

   c. Provide the formulas for determining the effective, target, and original outlet sample sizes.
      The SESS Sample Size Calculator was used to determine the minimum adequate sample size. Below is the formula for calculating a sample size using a one-tail test:

      Effective sample size:
      \[
      \frac{1}{\left(\frac{(s.e.)^2}{P(1-P)}\right) + \frac{1}{N}}
      \]

      where P is the maximum allowed RVR*, s.e. is the standard error of the estimate, and N is the total number of outlets in the sample frame.
The target sample size \( (n_t) \) is the effective sample size times the design effect from the previous year.

The original sample size is determined by:

\[
n_o = (1 + s) \frac{n_t}{r_l r_c}
\]

where \( s \) is the safety margin of 25%, \( n_t \) is the eligibility rate from previous year, and \( r_c \) is the completion rate from previous year.

*Synar activities are intended to keep the RVR below the 20% mark. So, the relevant null hypothesis is that the true RVR is 20% or higher. Thus, the calculated sample size will allow us to test if the RVR estimate in Puerto Rico was lower than the maximum allowed RVR.

10. Provide the following information about sample size calculations for the Synar survey conducted in FFY 2020.

   a. If the state uses the sample size formulas embedded in the SSES Sample Size Calculator to calculate the state level sample size, please provide the following information:

      **Inputs for Effective Sample Size:**
      - RVR: 20%
      - Frame Size: 4,731

      **Input for Target Sample Size:**
      - Design Effect: 1

      **Inputs for Original Sample Size:**
      - Safety Margin: 25%
      - Accuracy (Eligibility) Rate: 81.80%
      - Completion Rate: 91.40%

   b. If the state uses the sample size formulas embedded in the SSES Sample Size Calculator to calculate the stratum level sample sizes, please provide the stratum level information:

   c. If the state does not use the sample size formulas embedded in the SSES Sample Size Calculator, please provide all inputs required to calculate the effective, target, and original sample sizes as indicated in Question 9.
APPENDIX C: SYNAR SURVEY INSPECTION PROTOCOL SUMMARY

State: PR
FFY: 2021

Note: Upload to WebBGAS a copy of the Synar inspection form under the heading “Synar Inspection Form” and a copy of the protocol used to train inspection teams on conducting and reporting the results of the Synar inspections under the heading “Synar Inspection Protocol.”

1. How does the state Synar survey protocol address the following?
   a. Consummated buy attempts?
      ☑ Not permitted
   b. Youth inspectors to carry ID?
      ☑ Required
      ☑ Not permitted
   c. Adult inspectors to enter the outlet?
      ☑ Permitted under specified circumstances (Describe: When the retailer was found in violation, the MHAASA personnel and the Internal Revenue Agents entered the outlet to give a warning.)
      ☑ Not permitted
   d. Youth inspectors to be compensated?
      ☑ Required
      ☑ Not permitted

2. Identify the agency(ies) or entity(ies) that actually conduct the random, unannounced Synar inspections of tobacco outlets. (Check all that apply.)
   ☑ Law enforcement agency(ies)
   ☑ State or local government agency(ies) other than law enforcement
   ☑ Private contractor(s)
   ☑ Other
   List the agency name(s): Mental Health and Anti-Addiction Services
3. Are Synar inspections combined with law enforcement efforts (i.e., do law enforcement representatives issue warnings or citations to retailers found in violation of the law at the time of the inspection)?

☐ Always  ☐ Usually  ☐ Sometimes  ☐ Rarely  ☐ Never

4. Describe the type of tobacco products that are requested during Synar inspections.
   a. What type of tobacco products are requested during the inspection?
      ☒ Cigarettes  ☐ Small Cigars  ☐ Cigarillos  ☐ Smokeless Tobacco  ☒ Electronic Cigarettes/Electronic Nicotine Delivery Systems (ENDS)  ☐ Other

   b. Describe the protocol for identifying what types of products and what brands of products are requested during an inspection.
      The youth inspectors enter the outlet selected in the sample list with discretion. They have to observe where the cigarettes are located and check if there are one of the following brands: Newport or Marlboro. Youth inspectors proceed to ask the clerk for a pack of cigarettes of one of the brands mentioned. Youth inspectors are not supposed to convince the clerk in any way beyond asking once for cigarette pack. If there is a smoke shop in the sample, the youth inspectors should ask for an electronic cigarette.

5a. Describe the methods used to recruit, select, and train adult supervisors.

   MHAASA’s Prevention and Mental Health Promotion Assistant Administration operates 10 Regional Prevention Center (RPC) throughout the island. Each RPC provides services to a predefined geographic region serving 78 municipalities. The manager of each RPC decided which staff of its center was the adult supervisor.

   One staff member of the RPC supervised the youth inspectors at all times, but they never entered the outlet when the youth inspector was attempting to buy cigarettes. They were trained to provide transportation, locate the outlets, verify the locations, and supervise all inspection procedures.

   When the retailer was found in violation of the law at the time of the inspection, the MHAASA personnel and the Internal Revenue Agents entered the outlet to issue a warning.

   All the Synar personnel (RPC staff, agents of the Puerto Rico Treasury Department and youth inspectors) were trained by the investigators and participated in role-playing exercises.

5b. Describe the methods used to recruit, select, and train youth inspectors.

   The RPC staff identified candidates for youth inspectors in their geographic region. The candidates shall be 18 years of age at the time of operation and should be youthful in appearance. Also, they will have good communication skills, be capable of following specific and general directions, be available
to work after regular hours or weekends, and visit outlets from different municipalities in the assigned RPC. All the candidates must possess a valid identification card.

Staff from the RPC staff interviewed youth inspector candidates and submitted a listing of preliminary choices to the MHAASA Prevention Tobacco Coordinator, who conducted a second interview. In the second interview, the Tobacco Coordinator assessed the applicant’s interest in participating in the study, verifying the candidate’s physical appearance, verbal and writing skills and following instructions. After the selection was made, applicants had to comply with the agency contracting requirements.

At least one youth inspector was contracted by each RPC to conduct the random unannounced inspections as required. Youth inspectors were trained on the inspection protocol using written materials, verbal instructions, videos, role-play exercises, and data collection methods by the investigators.

6. Are there specific legal or procedural requirements instituted by the state to address the issue of youth inspectors’ immunity when conducting inspections?
   a. Legal
      □ Yes  ☒ No
      *(If Yes, please describe.)*

   b. Procedural
      □ Yes  ☒ No
      *(If Yes, please describe.)*

7. Are there specific legal or procedural requirements instituted by the state to address the issue of the safety of youth inspectors during all aspects of the Synar inspection process?
   a. Legal
      □ Yes  ☒ No
      *(If Yes, please describe.)*

   b. Procedural
      ☒ Yes  □ No
      *(If Yes, please describe.)*

Youth inspectors must follow these instructions:
- The youth inspectors are required to use the face mask at all times.
- One staff member of the RPC accompanies them at all times.
- Staff members do not enter the outlet when the youth is attempting to buy cigarettes.
- If there were a violation during the Synar inspection, all the intervention with the retailer is done by the MHAASA personnel and the Internal Revenue Agent of the Treasury Department. Immediately the attempt of purchase is done, the youth inspectors were instructed to leave the premises.
- Youth do not enter any outlet if they feel that surroundings make the youth feel concerned about their safety, and in such cases, they are instructed to leave the premises. A further attempt is made to complete the inspection.

8. Are there any other legal or procedural requirements the state has regarding how inspections are to be conducted (e.g., age of youth inspector, time of inspections, training that must occur)?

a. Legal

☒ Yes  ☐ No

(If Yes, please describe.)

As part of the Governors Executive Order 2020-033, all the population are required to use a face mask in order to enter any outlet. All the youth inspectors are required to use face masks all the time.

Puerto Rico can't use underage youth inspectors for the Synar Study. The law 246 of 2011 as amended forbids this for considering a risk activity. A consultation was made to the Department of Justice, the Children's Advocate expressed the practice can't be approved.

b. Procedural

☒ Yes  ☐ No

(If Yes, please describe.)

The youth inspectors had 18-20 years of age with youthful in appearance. All the youth inspectors, agents of the Department of Treasury, and RPC staff were trained in data collection methods by the researcher.
APPENDIX D: LIST SAMPLING FRAME COVERAGE STUDY

(LIST FRAME ONLY)

State: __________________________
FFY: 2021

1. Calendar year of the coverage study: _____

2. 
   a. Unweighted percent coverage found: _____
   b. Weighted percent coverage found: _____
   c. Number of outlets found through canvassing: _____
   d. Number of outlets matched on the list frame: _____

3. 
   a. Describe how areas were defined. (e.g., census tracts, counties, etc.)

   
   b. Were any areas of the state excluded from sampling?
      Yes  No
      If Yes, please explain.

4. Please answer the following questions about the selection of canvassing areas.
   a. Which category below best describes the sample design? (Check only one.)
      Census (Go to Question 6.)
      Unstratified statewide sample:
      □ Simple random sample (Respond to Part b.)
      □ Systematic random sample (Respond to Part b.)
      □ Single-stage cluster sample (Respond to Parts b and d.)
      □ Multistage cluster sample (Respond to Parts b and d.)
      Stratified sample:
      □ Simple random sample (Respond to Parts b and c.)
      □ Systematic random sample (Respond to Parts b and c.)
      □ Single-stage cluster sample (Respond to Parts b, c, and d.)
      □ Multistage cluster sample (Respond to Parts b, c, and d.)
      □ Other (Please describe and respond to Part b.) _____

   b. Describe the sampling methods.
c. Provide a full description of the strata that were created.

d. Provide a full description of how clusters were formed.

5. Were borders of the selected areas clearly identified at the time of canvassing?
   
   □ Yes  □ No

6. Were all sampled areas visited by canvassing teams?
   
   □ Yes (Go to Question 7.)  □ No (Respond to Parts a and b.)
   
   a. Was the subset of areas randomly chosen?
      
      □ Yes  □ No

   b. Describe how the subsample of visited areas was drawn. Include the number of areas sampled and the number of areas canvassed.

7. Were field observers provided with a detailed map of the canvassing areas?
   
   □ Yes  □ No

   If No, describe the canvassing instructions given to the field observers.

8. Were field observers instructed to find all outlets in the assigned area?
   
   □ Yes  □ No

   If No, respond to Question 9.

   If Yes, describe any instructions given to the field observers to ensure the entire area was canvassed, then go to Question 10.

9. If a full canvassing was not conducted:
   
   a. How many predetermined outlets were to be observed in each area? _____

   b. What were the starting points for each area? _____

   c. Were these starting points randomly chosen?
      
      □ Yes  □ No

   d. Describe the selection of the starting points.
e. Please describe the canvassing instructions given to the field observers, including predetermined routes.

10. Describe the process field observers used to determine if an outlet sold tobacco.

11. Please provide the state’s definition of “matches” or “mismatches” to the Synar sampling frame? (i.e., address, business name, business license number, etc.)

12. Provide the calculation of the weighted percent coverage (if applicable).
